PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate at RD Engineering College, expected to graduate in 2027. Interested in web development, backend development, Python, and AI/ML. Built project-based applications involving machine learning and deployed a mental health prediction application online. Seeking internship or entry-level opportunities to apply programming and software development skills.

TECHNICAL SKILLS

Programming:	Python, Java, C, C++, JavaScript, SQL
Frontend:	HTML, CSS, React.js
Backend:	Node.js, Express.js, FastAPI, REST APIs
Data Science & ML:	Pandas, NumPy, Matplotlib, scikit-learn
Tools:	Git, GitHub, Excel

PROJECTS

Mental Health Prediction System | Python, Machine Learning

- Built a machine-learning application to predict mental health risk from user-provided inputs.
- Deployed the application online for access through a live demo.

Live Demo: ml1-mahanantsingh-3.onrender.com

Accident Risk Prediction | Python, Machine Learning

- Created a project focused on road accident risk prediction using a machine-learning application.
